### ***REASONS FOR ALLOWANCE***

The following is an examiner's statement of reasons for allowance:

Claims **1-2 and 6** are allowable over the prior art of record because the prior art does not teach or suggest a method for forming a high-Re-content alloy film which contains Re at 98% or more by atomic composition, said method comprising the step of performing an electroplating process as presently claimed, esp., forming a high-Re-content alloy film which contains Re at 98% or more by atomic composition wherein the aqueous solution includes at least one of a Li ion or Na ion, in total concentration of 0.0001 to 5.0 mol/L.

The prior art does not contain any language that teaches or suggests the above. *Castonguay and Phillips* fail to teach forming a high-Re-content alloy film which contains Re at 98% or more by atomic composition wherein the aqueous solution includes at least one of a Li ion or Na ion, in total concentration of 0.0001 to 5.0 mol/L. Therefore, a person skilled in the art would not have been motivated to adopt the above conditions, and a prima facie case of obviousness cannot be established.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
